

## **TENT REPAIR:**

Coghlan's Tent Repair Kit is intended to repair small holes and tears in your tent material or window screen. When instructions are followed Coghlan's Canvas Cement will provide a strong, permanent repair resistant to water. For larger repairs we suggest you return your tent to a reliable tent or awning company where repair can be machine sewn. The cotton material in this kit has been waterproofed.

## **DIRECTIONS:**

Use the enclosed needle and thread to sew torn material together before applying patch. Cut patch material large enough to overlap tear by at least 1-1/2" on all sides. Round corners of patch with knife or scissors. Spread Coghlan's Canvas Cement evenly over entire patch. Press firmly on area to be repaired. Allow 2 hours to dry. For best appearance apply patch to inside of tent.
